

eXplorer 2.0 Installation Guide

1. If you have purchase a box version of the RP eXplorer 2.0, you can use the installer on the DVD. However it is better if you download the latest version of the plug-in, by following the steps below.
2. Login onto the www.robpapen.com homepage or create an account if you do not have one yet
3. Then register your RP eXplorer 2.0, using the serial from your registration email. NOTE: registering your plug-in will also does allow you to obtain support, updates and 2nd serials for additional computers.
4. Next click on the download link that pops up after registration and download the correct version for your computer.
5. **Installing on PC:** run the plug-in's installer and enter your serial. In case you forgot to enter your serial or entered it incorrectly, each plug-in will ask for it again, when you first use the plug-in in your host (music program).
The 64bits versions are for 64bits (music software) hosts and computers.
6. **Installing on Mac:** run the plug-in's installer and enter your serial. In case you forgot to enter your serial or entered it incorrectly, each plug-in will ask for it again, when you first use the plug-in in your host (music program).

If you have any questions regarding the installation of your RP software please look in the FAQ section or contact our support team at www.robpapen.com/yourdetails

For details on how to handle plugins in general, please look at your music software (host) documentation.
