

## Prisma Installation Guide

### Please read this first:

- **Prisma is a free product for Rob Papen (instrument) Plug-in users.**  
Even if you own a limited amount of RP instruments, you are still able to use Prisma.  
Presets from Prisma that use instruments that you don't own will be ignored when loading a preset but the other instruments will remain loaded into the Prisma preset.
- Whilst loading presets from Prisma you can compare it with loading data inside a sampler. Because of the amount of data, it will take longer to load.  
A message [ **Loading please wait...** ] will be displayed inside the readout field of Prisma to inform you that the preset is being loaded. Please wait before you play until the message has disappeared.
- By installing Prisma you agree to the **license terms from Rob Papen**, which can be read at the very end of this document.
- **CPU load**  
Prisma allows you to use 4 layers, this does mean more CPU usage, since it is similar to using 4 tracks in your music host. So keep this in mind whilst making music and it may also be wise to record the audio or 'freeze' Prisma in your composition if you don't wish to change the part anymore.
- **Stand-alone version of Prisma**  
During installation the stand-alone version of Prisma is also installed.  
Please download the PDF manual in 'My Products'.

## Installation PC:

- Log-in to your robpapel.com account and visit “My Products”.
- There you can click on “**Get Deal #2**”
- After clicking, the Prisma product registration will appear inside “My Products”
- Click on the download link that will pop up at the lower left corner below the Prisma product registration to open the download page.
- Download the correct version for your computer.
- Please close the music host program and run the plug-in installer.  
**There is no need to enter a serial.**
- Please carefully read the instructions during install.

### Important:

Prisma uses the latest VST3 versions of our plugins. The VST3 location for the Rob Papen folder is:

Program Files\Common Files\VST3\Rob Papen\

Note: if the Rob Papen plug-ins don't show up after installing Prisma, go to the upper right-hand corner for its control menu (3 small lines) and select 'Rescan' Or visit the back panel by clicking on the Prisma logo and re-scan again or select the correct location of the RP plug-ins.

For details on how to use plug-in's in general, please check your music software (host) documentation.

## Installing on Mac:

- Log-in to your robpapen.com account and visit “My Products”.
- There you can click on “**Get Deal #2**”
- After clicking, the Prisma product registration will appear inside “My Products”
- Click on the download link that will pop up at the lower left corner below the Prisma product registration to open the download page.
- Download the correct version for your computer.
- Please close the music host program and run the plug-in installer. There is no need to enter a serial.
- The installer will install VST3/AU/AAX in one go.

---

If you have any questions regarding the installation of your RP software, please check the FAQ section on our website or contact our support team at [www.robpapen.com/yourdetails](http://www.robpapen.com/yourdetails)

For details on how to use plug-ins in general, please check your music software (host) documentation.
